

The students of the Primary School in Taranto have studied the environmental questions

The students of the Primary School in Taranto have studied the environmental questions proposed by the Erasmus+ Project "G.R.E.E.N IN EUROPE" starting from the discussion of what they think environment is! Working in pair or in group they have immediately shown great interest towards the environmental education and the activities proposed by their teachers.

All the subjects have been involved in this training period: science, foreign languages , geography as well as the study of the ICT have been instruments to lead the students to think about the environmental questions. Looking around their own territory they found out what are the "environmental problems" of their town and which "GOOD PRACTICES" the town and its citizens can improve to solve its own environmental problems.

At the moment they are focusing the "best practices" linked to the exploitation of TARANTO SEA and its treasures (the benefit of aquatic plants, the mussel collectors ,dolphins safe, tortoise health).

At the same time , in order to get a "green lifestyle" ,they started finding real "green actions" to do every day at school and at home (recycle of water and plastic bottles, clean up of their classrooms..., bedrooms...)!
