

Eco-Schools

Eco-Schools is an international environmental education programme developed by the Foundation for Environmental Education (FEE) in 1994 and run in Wales by Keep Wales Tidy.

Eco-Schools is one of a kind – it's student led which means young people drive the programme (with a little help from their Eco-Coordinator, of course!)

It's designed to empower and inspire young people to make positive environmental changes to their school and wider community, while building on their key skills, including numeracy and literacy, and encompassing Education for Sustainable Development and Global Citizenship.

The programme is funded by Welsh Government and free for Local Authority schools.
