

# THE FOOD ASSEMBLY

**Proposer Country**

Basque Country

**What kind of BEST PRACTICE is it?**

B

**Give a title to the BEST PRACTICE**

THE FOOD ASSEMBLY

**To which subject of the Sustainability does it refer?**

3, 12 and 15

**Who does it practise ?**

Small communities

**Where?**

26 Miles Average distance of a product sold through The Food Assembly.

**Why do you think that this best practice can be exported ?**

It is good way to preserve oceans and to create a new kind of business at the same time. While creating an artificial reef a new kind of cellar is developed.

**Describe the activity**

The Food Assembly brings together people to buy fresh food directly from local farmers and foodmakers.

With our technology and support, everyone gets a better deal: communities get to know each other, farmers get a fairer price for their work, and you get locally sourced, unique produce: the most delicious food available!

Selling through The Food Assembly, farmers and foodmakers get over 80% for every product sold, compared to the 15%-25% that most supermarkets offer them.

**Give a title to the BEST PRACTICE**

**UNDERWATER CELLAR**

**To which subject of the Sustainability does it refer ?**

9 and 14

**Who does it practise ?**

**CRUSOE TREASURE**

**Where?**

**Crusoe Treasure is located in Plentzia Bay, in Biscay, approximately 20 km northeast of Bilbao**

**When ?**

**It started in 2008**

**Why do you think that this best practice can be exported ?**

**It is good way to preserve oceans and to create a new kind of business at the same time. While creating an artificial reef a new kind of cellar is developed.**

**Describe the activity**

**Crusoe Treasure is a limited-edition boutique wine aged at the bottom of the sea in the first underwater cellar and artificial reef in the world.**

Crusoe Treasure is created for adventurous and passionate wine lovers who wish to experience fine wine and unique spirits unlike anything on land. Unlike other beverages, Crusoe Treasure has perfected the science of aging wine underwater through years of research and technology innovation. They are dedicated to revolutionizing the wine industry through sustainable practices while creating greater awareness about our oceans.

# Environment and Sustainable Development using SCRATCH

SAGRADO CORAZÓN IKASTETXEA students talk about Environment and Sustainable Development using SCRATCH.

Scratch helps young people learn to think creatively, reason systematically, and work collaboratively – essential skills for life in the 21st century.

Scratch is a programming language and an online community where children can program and share interactive media such as stories, games, and animation with people from all over the world. Scratch is designed and maintained by the Lifelong Kindergarten group at the MIT Media Lab.

Here are their jobs:

### Who does it practise ?

Everyone who lives in Bilbao or goes there

### Where?

Bilbao

### When?

*Subway:* Everyday, everytime nearly every 5 minutes in different directions

*Bicycles:* From Monday to Friday, 9:00a.m-7:30 p.m

### Why do you think that this best practice can be exported ?

Because in our opinion this practice is not so expensive, and most people like it, it is a quick way of transport. On the other hand bicycles also have other advantages: when you are practicing it you exercise your body, so apart from helping to

save the environment, you can also have fun and keep healthy at the same time.

### **Describe the activity**

Just a few years ago Bilbao's town hall created this project called "Bilbon bizi" to save the environment and to promote the use of bikes. There are some establishments around the city where you can rent bikes. There are a lot of ways to contact with those places and you just need to send your documentation. Although it is not the most comfortable transport to go through Bilbao, taking into account that there are slopes, it is the most sustainable one.

Even though it is not as sustainable as bikes, the subway is the most comfortable one. The first idea of building a subway system in Bilbao came up at the 1920s.

In 1971 the government of Bizkaia created a commission to evaluate the transportation needs of Greater Bilbao. Five years later two proposals were created to start a subway service, the first of them is almost identical to the current network.

Finally in 1987 the Basque Government approved the plan to build and finance the Bilbao Subway. It was founded in 1995 and nowadays is the most used transport to go through Bilbao.

## Who does it practise?

Askora is one of the companies that practises the use of green products.

## Where?

Askora carries out this practise in some schools and other places. One example is our school. Apart from here, it is also carried out in other parts of our area. Askora also render services in Gipuzkoa, Bizkaia, Navarra, Araba and La Rioja.

The central office is in San Sebastian, Gipuzkoa.

## When?

Askora service is always working, but our school only has few highlight days in which we eat ecological or local food.

They started working in 2015, few years ago.

## Why do you think that this best practice can be exported ?

This company is committed with local producers so people gets interested. Despite being interested, local products are an advantage for our environment because they do not have to use much transport. So, using local products is a way to pollute less. Because of that, this company can be exported.

## Describe the activity

Askora is a group that is committed with local lands, products and producers. The forty per cent of the menus contain local and ecological products. The days that the menu is not highlighted the food is not local or ecological.
