

A PACKAGING... EXPERIENCE!

One of the classes of our 10 years old students of the primary school today have worked together with a group of students of the low secondary school (13 years old) to realize something very interesting!

The “packaging” of a product!

The children of the primary school, after having studied the “process” that leads to the biological production of a typical apulien food product, have thought how to “package” it !

They made a lot of drafts and written some procedures underling the importance of using “recycled” materials!

At the end, with the help of the low secondary school students, their tutor during the activity, they made a lot of different "packaging" proving their "entrepreneurial skills"!

The experience has been great!

And now... we are starting working on the “***advertising poster***”!
