

Environment and Sustainable Development using SCRATCH

SAGRADO CORAZÓN IKASTETXEA students talk about Environment and Sustainable Development using SCRATCH.

Scratch helps young people learn to think creatively, reason systematically, and work collaboratively – essential skills for life in the 21st century.

Scratch is a programming language and an online community where children can program and share interactive media such as stories, games, and animation with people from all over the world. Scratch is designed and maintained by the Lifelong Kindergarten group at the MIT Media Lab.
