# **“G.R.E.E.N in Europe” surfs on the webpages of Taranto’s newspapers**

Today on the webpage of one of our local newspapers it has been posted an interesting article concerning our project. Our two years teaching and learning experiences; the exchange of “best practices” on eco-sustainable themes, lived also through the mobilities, have been shared with a community of people that needs to be encouraged in changing their own lifestyle. Thanks to this project Taranto’s citizenship is considering how important is to grow up in new generations the awareness in protecting and respecting the environment since the youngest age of its own population.

For Taranto it’s just a starting point!

Here the link to the article
