# WHAT CAN WE DO?

One of the **17 goals indicated in the Agenda 2030** is “***SUSTAINABLE CITIES AND COMMUNITIES***”.

Taranto is a city with a lot of environmental problems and the children of the primary school, above all the 10 years old students, have faced the question : “***HOW DO YOU IMAGINE YOUR TOWN IN FUTURE?***”

The experience shared with the students of the Secondary School after their mobility in Bilbao and the one done by the children of the primary school in Wales have inspired these ideas...and children have “projected” these possible changes...
